

## Quality Policy

**RENEX Electronics Education Center is a company that provides development services - training and consulting in the electronics industry and related industries to meet the high demands of our customers.**

The top management of Renex EEC, aware of importance of quality for further growth of the company, declares a Quality Policy based on the most important goal, which is to offer our Customers development of services at the highest possible level.

We have in mind exceeding customers' expectations by expanding the range of offered training, so that they develop the potential and facilitate the success of our customers.

The implementation of our Quality Policy is based on the universal awareness, that the responsibility for quality rests on all employees of the company and at every work stand.

Achieving the goals of our Quality Policy results from the awareness of the owner and employees of the Company, that the requirements of ISO 9001:2015 supports business.

We realize the Company's strategic goals by:

- Setting goals and planned following in their direction.
- Meeting the applicable requirements.
- Caring for quality awareness among the crew.
- Taking into consideration context of functioning of the Company.
- Analyzing risks and exploiting opportunities.
- Continuous improvement of implemented quality management system.

I declare, that all Company staff have read the Company's Management's statements regarding the Quality Policy and know and apply in practice the findings contained in the established Quality Management System.
